

The zazen Alkaline Water system replicates Mother Nature's water cycle transforming your drinking water with our 10 Stage State-of-the-Art process into refreshing, alkaline mineral water that hydrates you immediately at a cellular level!

The properties of the zazen Alkaline Water System:

Alkalises

pH around 7.4 (can increase up to 8.5 pH using our zazen Alkalinity & Anti-Oxidant Enhancer), depending on your source water

Reduces Fluoride

Up to 90% with our Multi-Stage Filter Cartridge using world-class media certified in the USA

Exceptional Quality

Filters harmful THMs, poisonous heavy metals and other bacteria down to 0.2 micron

Glass Option

Glass Bottom Tank option - all plastics are BPA & Phthalate Free

Tastes Delicious

Everyone loves it, especially kids!

Hydrates

Immediately at a cellular level helping to release toxic waste

Nourishes

With a balanced range of essential minerals & electrolytes

Excellent Quality

Clean, fresh, affordable, tastes great!

How does it work?

The zazen Alkaline Water system has been designed to emulate Mother Nature's natural water filtration and remineralisation process. Water in nature filters slowly through Mother Earth before bubbling up through a pristine spring, full of energy and life force, essentially living water.

Our drinking water becomes contaminated in two main forms: bacterial and chemical. With a State-of-the-Art 10 stage process, the zazen Alkaline Water filter system works to clean your water, reducing bacterial & chemical contamination, and then rebalance, remineralise, protect and restructure the water so that you enjoy the very best alkaline drinking water full of essential health benefits.

It has been designed by zazen, in collaboration with leading Japanese and Korean water scientists, specifically for Australian and New Zealand water supplies.

STAGE ONE - Ceramic Filter

Replace every 12 months

- Constructed of highly compressed and fired Diatomite earth with a pore size 0.2 – 0.5 micron.
- Removes rust, sediments and organic matter.
- Stops bacteria, cysts, parasites and hazardous micro-organisms.

STAGE TWO – SEVEN – The zazen Multi-Stage Filter Cartridge

Replace every 4 to 6 months (*6 months up to 12 Litres / day, 4 months 12 litres + a day e.g family/office*).

Stage 2 – Silver Activated Carbon

- High quality silver activated carbon inhibits bacteria growth in filter.
- Reduces chlorine, herbicides & pesticides, industrial poisons & MTBE's, Trihalomethanes (THM's), organic chemicals, odours and particulates.
- A purifying surface area of over 68 acres! (Silver is not released into the water)

Stage 3 – Fluoride Reduction

- Designed for the effective filtration and reduction of up to 90% Fluoride in treated water supplies.

Stage 4 – Activated Zeolite

- **Inhibits bacteria and traps heavy metals such as lead, aluminium, nickel, cadmium and mercury.**
- Removes detergents, ammonium, agricultural chemicals and other toxins.

Stages 5, 6 & 7 – Bio-Ceramic Pi, FIR Energy Balls & Silica Sand

- Constructed from highly compressed diatomaceous earth and mineral oxides.
- Emits beneficial Far-infrared to energise the water and Pi energy to enhance bioavailability.
- Provides additional filtration to balance pH and neutralises acidic components in tap water.
- “Polishes” the water for brilliant clarity and sparkle.
- Infuses natural silica – renowned for strengthening collagen for radiant hair and nails.

STAGE EIGHT - Natural Mineral Stones (1kg box)

Replace every 5 years

- Contains calcium, iron, magnesium, potassium, silicon and other trace minerals. *WHO – the World Health Organisation recommends drinking water containing all these minerals.
- Helps balance, fortify and assist with pH and increases the amount of dissolved oxygen in the water.
- zazen Mineral Stones are mined from pristine deposits 300 + metres below the earth’s surface without damage to the environment.

STAGE NINE - Silver Stones (500g box)

Replace every 12 months

- Silver is a natural anti-bacterial agent which by design keeps the lower tank clean and maintenance free – you only need to clean the bottom tank once a year!
- The zazen Silver Stones naturally preserve the freshness of the water in the zazen tank through this anti-bacterial effect – ensuring the best quality water is ready to drink all day, every day. (Silver is not released into the water).

STAGE TEN - Magnetic Energy 1200 Gauss Tap

- In this final stage we surround the water with magnetic energy – just as spring water is exposed to the earth’s magnetic energy.
- Restructures – magnetising water creates a free flowing hexagonal structure and also breaks down the size of water clusters for faster, immediate cellular hydration.
- As the water tumbles through the magnetic tap oxygen is increased (a natural anti-oxidant).

System comes ready to set up and includes:

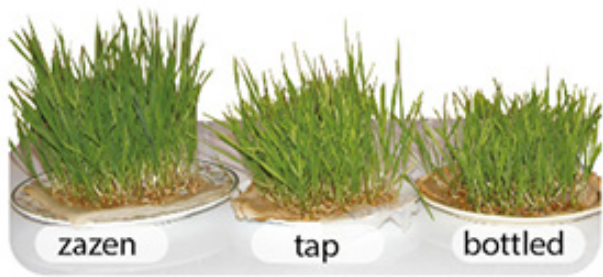

- 1 x zazen Multi-Stage Filter Cartridge
- 1 x zazen Ceramic Filter
- 1 x zazen Silver Stones
- 1 x zazen Mineral Stones
- 1 x zazen Magnetic Tap
- 1 x zazen Alkalinity & Anti-Oxidant Enhancer (Free)

When you purchase the zazen Glass Bottom Tank as an optional extra tank, you will also receive the BPA-Free Plastic Bottom Tank with your zazen Alkaline Water System purchase.

How much does it cost? Using 12 Litres a day costs only 5c per litre!

Product	Replacement Schedule	Cost
zazen Alkaline Water System		\$495 RRP
- Multi-Stage Filter Cartridge	Replace 2 x per year	\$49.95 each
- Ceramic Filter & Silver Stones	Replace 1 x per year	\$49.95 each
- Mineral Stones	Replace 1 x every 5 years	\$59.95 each

The annual replacement costs for a zazen Alkaline Water system are the same as maintaining a Brita Jug!

Cellular Hydration is the essential ingredient and your foundation for any long term plan for health and vitality
